

BIOGRAPHY

Riccardo Tomasi received a double M.S. degree in telecommunications engineering from the Politecnico di Torino, Italy, and the Institut National Polytechnique de Grenoble, France. In 2006 he joined Istituto Superiore Mario Boella, where he currently coordinates the "Internet-of-Things Service Management" Research Unit, one of the units of the Pervasive Technologies (PerT) area. Riccardo is a passionate user and developer of open source solutions and his research interests are centered on open eco-systems for Internet of Things (IoT) system, with focus on tools and technologies to ease interoperability of heterogeneous systems, especially in Smart Energy (SE) applications. Since 2013, Riccardo chairs the "Reference Implementation and Demonstration" working group of the Energy@home association.
